

BRENTWOOD PHARMACY
761 Suffolk Ave , Brentwood , NY , 11717
Phone#: 6312733314 Fax#: 6312738863

Drug NDC: 00603-0839-58
Drug Name: Q-PAP

How should I use this medicine?

Take this medicine by mouth. This medicine comes in more than one concentration. Check the concentration on the label before every dose to make sure you are giving the right dose. Follow the directions on the package or prescription label. Use a specially marked spoon or dropper to measure each dose. Ask your pharmacist if you do not have one. Household spoons are not accurate. Do not take your medicine more often than directed. Talk to your pediatrician regarding the use of this medicine in children. While this drug may be prescribed for children as young as 2 years old for selected conditions, precautions do apply.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.
NOTE: This medicine is only for you. Do not share this medicine with others.

Where should I keep my medicine?

Keep out of reach of children. Store at room temperature between 20 and 25 degrees C (68 and 77 degrees F). Protect from moisture and heat. Throw away any unused medicine after the expiration date.

NOTE: This sheet is a summary. It may not cover all possible information. If you have questions about this medicine, talk to your doctor, pharmacist, or health care provider.

What should I watch for while using this medicine?

Tell your doctor or health care professional if the pain lasts more than 10 days (5 days for children), if it gets worse, or if there is a new or different kind of pain. Also, check with your doctor if a fever lasts for more than 3 days. Do not take acetaminophen (Tylenol) or other medicines that contain acetaminophen with this medicine. Too much acetaminophen can be very dangerous and cause an overdose. Always read labels carefully. Report any possible overdose to your doctor right away, even if there are no symptoms. The effects of extra doses may not be seen for many days.

What is this medicine?

ACETAMINOPHEN (a set a MEE noe fen) is a pain reliever. It is used to treat mild pain and fever.

This medicine may be used for other purposes; ask your health care provider or pharmacist if you have questions.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions: -if you often drink alcohol -liver disease -phenylketonuria -an unusual or allergic reaction to acetaminophen, other medicines, foods, dyes, or preservatives -pregnant or trying to get pregnant -breast-feeding

What if I miss a dose?

If you miss a dose, take it as soon as you can. If it is almost time for your next dose, take only that dose. Do not take double or extra doses.

What side effects may I notice from receiving this medicine?

Side effects that you should report to your doctor or health care professional as soon as possible: -allergic reactions like skin rash, itching or hives, swelling of the face, lips, or tongue -breathing problems -redness, blistering, peeling or loosening of the skin, including inside the mouth -sore throat with fever, headache, rash, nausea, or vomiting -trouble passing urine or change in the amount of urine -unusual bleeding or bruising -unusually weak or tired -yellowing of the eyes, skin Side effects that usually do not require medical attention (report to your doctor or health care professional if they continue or are bothersome): -headache -nausea, stomach upset

This list may not describe all possible side effects. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.
